PLAS-TEX® WALL COVERING & PANELS PROVIDE ALTERNATIVE TO FIBERGLASS

MIDDLEBURY, IN - Many builders and designers are looking for a good alternative to the traditional fiberglass panels used in situations requiring a wall to be waterproof, sanitary and highly durable. PLAS-TEX® Wall Covering & Panels, now available from Parkland Performance Walls & Ceilings, gives them a choice.

Not only does PLAS-TEX eliminate the presence of fiberglass, fiberglass dust and the general negative connotation that goes with it, but the product is environmentally friendly as well. It's made totally from reclaimed materials and is, in and of itself, reclaimable. It has the qualities of other competitive products in that it is 100% waterproof and will not support mold, mildew or the growth of bacteria. Plus it's easier to work with; eliminating fiberglass hazards, and is available in a selection of attractive finishes including smooth, matte, and haircell, as well as the more common pebbled surface.

PLAS-TEX Wall Covering, similar to vinyl wall coverings, is an extruded flexible sheet. PLAS-TEX Panels, on the other hand, are manufactured as an extruded, rigid panel, 3/16" to 5/8" thick. Because both are non-absorbent, there's no swelling, rotting or water discoloration. PLAS-TEX is hygienic, does not contribute to "sick building syndrome", and is not affected by acids, harsh chemical solvents or petroleum products. It is also important to note that it is not affected by salt air.

Very easy to install with Parkland Performance adhesive, both the wall covering and the panels are highly durable. The color goes all the way through the panel, eliminating noticeable scratching and marring. Harmonizing moldings are available with the panels to give a total finished appearance to the job. PLAS-TEX Wall Covering and Panels give builders a solid choice in tackling problematic areas of the home. Laundry rooms, baths, garages, utility rooms... wherever moisture might be present or sanitary conditions are required.

PLAS-TEX Wall Covering & Panels are the foundation of an ever-growing line of products from Parkland Performance Walls & Ceilings, all intended to respect the specifier's desire for exceptional aesthetic qualities while addressing the rigors of everyday use of spaces-

residential or commercial. More detailed information is available by calling 800-835-4110 or on the web at www.parklandproducts.com.
