PARKLAND INTRODUCES PVC PLANK AND WAINSCOT SYSTEM

MIDDLEBURY, IN - The New PolyMAX Wainscot® system and plank product, now available from Parkland Performance Walls & Ceilings, are ideal for residential and commercial applications that require demanding performance characteristics yet benefit from eye-appealing architectural style. This new PVC product is totally waterproof and consists of reversible 6" planks featuring two different patterns, base molding with a built in moisture seal, and chair railing designed to accommodate minor variations in top-to-bottom heights on wainscot applications.

Available as 8' planks for custom total wall applications and in a traditional 3' total wainscot system, PolyMAX is 100% waterproof, non-absorbent and will not swell or rot. Ideal for high-moisture areas, it is mold and mildew resistant, will not harbor bacteria, is easy to clean and virtually maintenance free.

PolyMAX Wainscot and Plank is especially suited for residential use in bathrooms, laundry areas, basements and other areas where practical considerations walk hand-in-hand with the desire for pleasing aesthetic qualities. The weather-resistant nature of the product makes it ideal for use as wainscot on outdoor verandas, for use as porch ceilings and to dress-up garages. Applicable to a wide variety of commercial applications as well, PolyMAX is virtually maintenance free and resists scratching and marring.

The PolyMAX Wainscot system is easily, cleanly and quickly installed using Parkland Construction Adhesive or other readily available construction adhesive products. It comes complete with harmonizing base molding and chair rail. The tongue-and-groove planks, both the wainscot and the full eight-foot lengths, are reversible, featuring a classic beaded groove on one side and a traditional groove on the other. The clean and attractive white surface can be left exposed or it can be easily painted in one coat to match any décor.

PolyMAX is one of an ever-growing line of products from Parkland Performance Walls & Ceilings, all intended to respect the specifier's desire for exceptional aesthetic qualities while addressing the rigors of everyday use of spaces, residential or commercial. More detailed information is available by calling 800-835-4110 or on the web at www.parklandproducts.com.
